

## Simple.

1. Connect the power dongle to the installed subscriber module\*
  2. Open the cnArcher app on your mobile device.
  3. cnArcher will automatically connect and guide you through the installation.
- Or try the app in "Demo Mode"- no radios required.

\*Cambium has tested with PowerLINK 15W – Passive PoE 24V-15W Battery WiFi, <http://bit.ly/2fh4B8x>. Alternatively, a standard WiFi AP, in bridge mode, can be used to establish connectivity between the mobile device and subscriber module LAN interface.

## ABOUT CAMBIUM NETWORKS

Cambium Networks is a leading global provider of wireless broadband solutions that connect the unconnected. Through its extensive portfolio of reliable, scalable and secure WiFi and wireless broadband point-to-point (PTP) and point-to-multipoint (PMP) platforms managed by cloud-based software, Cambium Networks makes it possible for all service providers; enterprises; governmental and military agencies; oil, gas and utility companies; Internet service providers; and public safety networks to build powerful communications networks, reach users from 200 kilometers across mountain tops down to the last meter to their devices and intelligently manage their infrastructure through end-to-end network visibility and actionable analytics. Headquartered outside Chicago and with R&D centers in the U.S. Ashburton, U.K. and Bangalore, India, Cambium Networks sells through a range of trusted global distributors.

# Bullseye on Every Install

Raise the bar on installation accuracy with **cnArcher™**, the free Android app that gives field techs the information they need to configure and properly align Cambium Networks PMP wireless broadband subscriber modules.

Designed with input from field technicians and years of experience on our millions of wireless broadband modules deployed, cnArcher validates configuration and alignment in seconds.

Increase the number of installs done right the first time, and increase customer satisfaction. Eliminate problems, and focus your manpower on connecting new subscribers as your network grows.

-  Reduce installation time
-  Increase performance with optimized aiming
-  Automatically populate GPS lat/long on every subscriber
-  Validate installations while on site
-  Reduce repeat dispatches to correct alignment issues
-  Increase customer satisfaction

### In tandem with **cnMaestro™**

- Automatically on-board devices
- Upgrade device software
- Apply configuration templates (and device-specific variables)

**Download the beta version of the free cnArcher™ app today, and get a bullseye every time.**
