

PD4 Series

DMR handheld radios

With long battery service life, low weight and the integrated RFID reader in the PD415, the radios in the PD4 series are your optimal companion for everyday work. The radio series supports analog and digital operation and in this way eases the smooth transition to digital radio.

Highlights

Integrated RFID reader (PD415)

With the integrated RFID reader, the PD415 can read information from an RFID tag and transmit this information automatically by radio. In this way the radio supports the Hytera Patrol System.

Patrol System with the PD415

The Hytera Patrol System is a patrol system for the management of patrol information. With the aid of this solution the positions of the security personnel can be monitored in real-time on a digital map in a control room. The patrol system is ideally suited to security solutions for large department stores, industrial facilities, warehouses or hotels.

Impressive voice quality

With their embedded digital technology the radios in the PD4 series produce outstanding voice quality even in noisy environments and at the outer perimeter of radio coverage.

Improved utilization of the frequency spectrum

Thanks to the TDMA method, the DMR radios make it possible to configure the available bandwidth with double the channel capacity of conventional analog radio. This has a clear mitigating effect on increasing spectrum scarcity.

Mixed analog and digital channel

This function ensures that the PD4 radios can detect analog and digital signals and change automatically to the relevant operating mode.

Robust

Both radios are dust and water-resistant according to IP55 (PD405) or IP54 (PD415) and meet the US military standard MIL-STD-810 C/D/E/F/G.

Additional Functions (selection)

- Different operating modes: analog, DMR Tier II or mixed
- Digital or analog channel search
- Supports pre-programmed text message transmission
- TDMA direct mode allows up to two simultaneous calls, even without repeater
- VOX (voice-controlled send keying)
- Small, slim, light
- Individual call, group call and all call

Programmable keys
