

The Power of Reliability

INTELLICHARGE SERIES

DC Power Supply and
Three-Stage Battery
Charger for Wireless
Base Stations

Shown with optional high resolution OLED display

ICT IntelliCharge Series DC power supplies with integrated three stage battery charger are ideal for small wireless access points, broadband, and backhaul applications. Intelligent battery charging and integrated low voltage disconnect charge and protect your battery, while the high efficiency design and power factor corrected AC input saves power, ideal for a cost effective solution for smaller sites.

- ▶ CE certified with universal AC input and power factor correction
- ▶ 180 or 360 watt models to meet the requirements of small base station applications
- ▶ Intelligent three stage charging restores battery quickly and safely
- ▶ Integrated Low Voltage Disconnect safeguards battery
- ▶ Form C alarm contacts provide remote monitoring and alarms
- ▶ Front panel charging indicator and optional high resolution OLED display
- ▶ Temperature compensated charging with optional Battery Temperature Sensor
- ▶ Cabinet or rack mounting
- ▶ Available with 48, 24 and 12 volt DC output
